

Daemonsthenes

Strategic Intelligence for the Modern Debater

Freeing up the user's resources

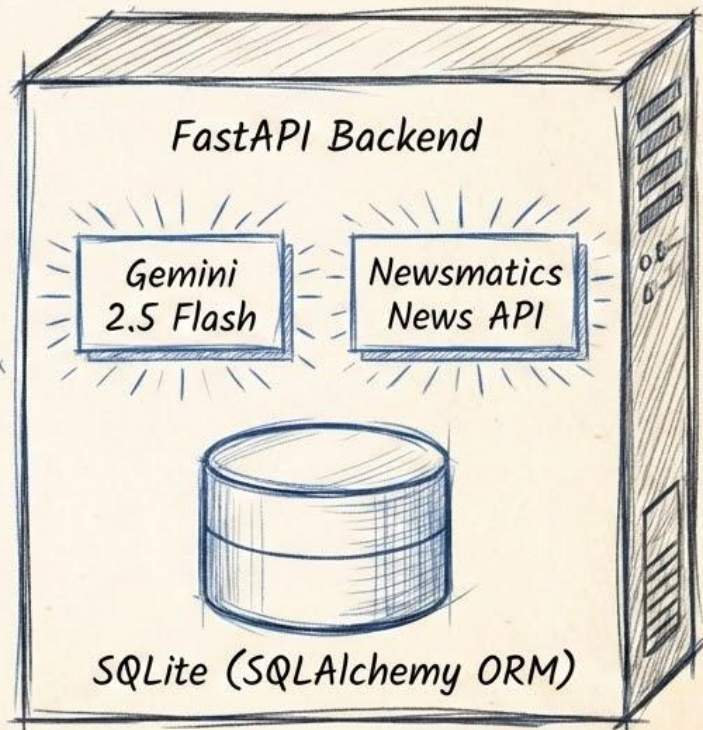

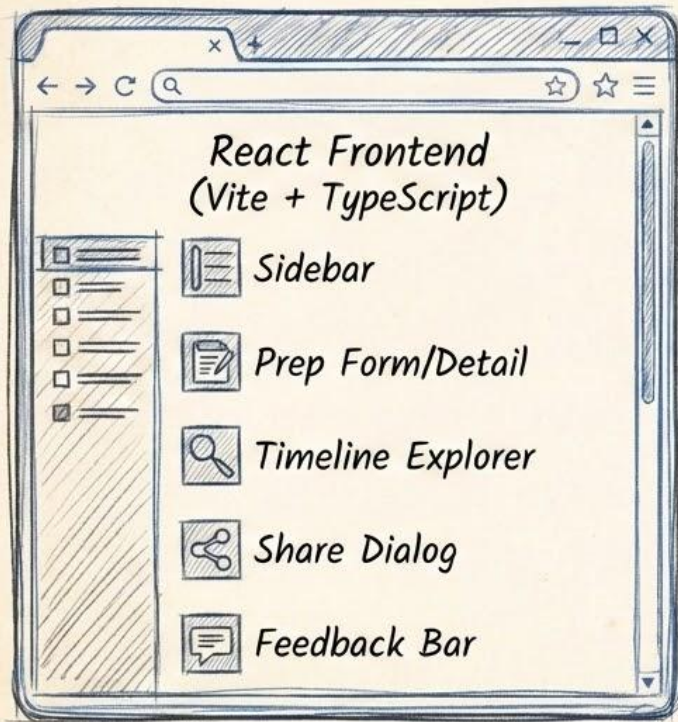

- Pareto principle (80/20) widely referenced in the debating circles
 - 80% time spent on crawling through sources, 20% defining the strategy
 - Signal vs. noise: issue of identifying relevant articles solely via full-text search
- Daemonthenes is here to flip the ratio for you
- focus on the stuff that matters when preparing: rehearsing, identifying the opponent's weak spots

Tools used for development

- Python backend
 - fastAPI
 - Google Gemini API (Gemini 3 Flash)
 - SQLite
- React backend
 - REACT 19
 - TypeScript, Tailwind CSS, shadcn/ui
 -
- Antigravity IDE
 - Claud Opus 4.6 / Gemini 3.1 Pro
